Speaker (Salutation, acad. title, first name, surname, job title, company)

Innovative Automotive Transmissions and Hybrid & Electric Drives

 **North America**

Abstract (Focus on the basic message and results of the investigation/development.)

Relation to two of the main topics by priority (Please select two priorities)

Priority 1:

- Markets, requirements, strategies
- Transmission concepts for passenger cars
- Powertrain integration
- Comfort, driving enjoyment and safety
- Transmissions and drives for commercial vehicles
- Electronics in transmission and drive train
- Environment-friendly drives
- Transmission shifting
- Starting devices
- NVH and acoustics in drive trains
- All-wheel drive systems
- Mechatronics, hydraulics, transmission lubrication and materials
- Tools for designing and optimizing transmissions and components
- Transmission manufacturing and production

Priority 2:

- Markets, requirements, strategies
- Transmission concepts for passenger cars
- Powertrain integration
- Comfort, driving enjoyment and safety
- Transmissions and drives for commercial vehicles
- Electronics in transmission and drive train
- Environment-friendly drives
- Transmission shifting
- Starting devices
- NVH and acoustics in drive trains
- All-wheel drive systems
- Mechatronics, hydraulics, transmission lubrication and materials
- Tools for designing and optimizing transmissions and components
- Transmission manufacturing and production

Has this topic been presented before?

Please explain in brief how big the news value of this work is
